

## **Chicago Plumbing Code Class – Chicago Training Center**

Chicago Plumbing Code front to back, this open code class will cover all sections of the code book. In addition, some comparisons between the Chicago Code and State Code will be discussed to provide clarity on differences. Each section will include written based code review along with supplemental code search worksheets to become well versed in navigating the book and quizzes to give a well-rounded exposure to the material. This class utilizes an online based quiz platform so plan on having a charged phone to participate. This is an open class format; you can join any class at any point in the schedule. This schedule is an outline and section material may carry over to following weeks to cover all necessary topics, if a specific topic is desired, please reach out to Cody Thiesse to confirm when the desired section will be discussed.

Classes will meet once per week. Class starts at 4:30pm and will be approximately 2 ½ hours. Be there at least 15 minutes before class starts, as no one will be admitted after class starts. The building entrance will be locked after 4:30.
